Cate Bauer-Martinez
Senior REDCap Analyst

Icahn
School of
Medicine at
**Mount
Sinai**

Introduction – Team Members

Patricia Kovatch
Professor and Dean for Scientific Computing and Data Div.

Ranjini Kottaiyan
Senior Director Finance & Administration

Farhan Mahmood
Director, Scientific Computing

Eric Rosenberg
System Administrator

Rupan Hossain
Database Administrator

Mark Green
Executive Director Scientific Computing and Data Div

James Chip Masters
Director of Research Data Services Scientific Computing and Data Div

Savas Sevil
REDCap Product Owner

Cate Bauer-Martinez
Senior REDCap Analyst

Jing Yang, PhD
Applications Support Analyst

May want to check if new grant award number.

Welcome to REDCap!

➢ REDCap is a secure web platform for building and managing online databases and surveys.

➢ REDCap offers a streamlined process for rapidly creating and designing projects. REDCap also offers a vast array of tools that can be tailored to virtually any data collection strategy.

Agenda

- ➤ **REDCap Account Management for internal and external collaborators**
- ➤ **Development vs Production**
- ➤ **Project Ownership and User Rights**
- ➤ **Orphaned projects and transferring ownership**
- ➤ **Resources**

REDCap Account Management

All users must have a REDCap account

➤ All REDCap accounts require Mount Sinai credentials
➤ REDCap accounts = Mount Sinai credentials
➤ Username and password
➤ **NOTE:** We cannot reset passwords - > REDCap require Mount Sinai credentials

Please log in with your user name and password. If you are having trouble logging in, please contact Mount Sinai REDCap Support.

| Username: | |
| Password: | |

Log In   Forgot your password?

Types of accounts

➤Internal accounts

➤External accounts

How do I obtain a REDCap account? Internal collaborators

All Mount Sinai users must have a REDCap account
Mount Sinai or Icahn School of Medicine employee
➢ Log in with your Mount Sinai credentials
➢ Username
➢ Password
➢ On your first login, verify your email

⊘ Verify your email address
Your email address has been confirmed.

Please log in with your user name and password. If you are having trouble logging in, please contact Mount Sinai REDCap Support.

Username: [_____]

Password: [_____]

Log In   Forgot your password?

How do I obtain a REDCap account? External collaborator

All external users must have Mount Sinai credentials

PI or other sponsor/delegate must request on behalf of external collaborator

▶ Through **Sailpoint,** request a Non-Employee account (**External Researcher**)

▶ Once approved, the PI will receive an email notification informing them that the SailPoint request is complete. This email will contain a Mount Sinai username and password for the collaborator.

▶ Share Mount Sinai username and password with the external collaborator

How do I obtain a REDCap account?
External collaborator
Sailpoint interface

How do I obtain a REDCap account? Part 2! External collaborator
All external users must have Mount Sinai credentials

External Collaborator must:
- ▶ Navigate to https://mshmsvpn.mssm.edu to change their password
- ▶ Change their Mount Sinai Password
- ▶ Navigate to https://redcap.mountsinai.org
- ▶ Log in with their Mount Sinai Login ID and new Password
- ▶ Upon first login, the Collaborator will be prompted to verify their email address. *Note: use an active email address.*
- ▶ Collaborators can then create new projects or be added to existing projects by the project owners.
- ▶ *Please note*: **Collaborator accounts are temporary and will expire at 120 days, however they can be renewed by the PI or other sponsor/delegate prior to the expiration date**.

Development vs Production

How do I know if my project is in Development or Production?

Development Project	19088	0	119	6 forms	■	🔧
Production Project	19089	0	119	6 forms	■	☑

All projects are in **Development** status when first created. In Development, you can design, build and test your REDCap projects. Changes happen in real-time. There are no safeguards to protect your data.

The Production status provides safeguards to ensure that data which has already been collected is not deleted, re-coded or overwritten unintentionally. Moving your project to **Production** ensures you're maintaining data accuracy, integrity, quality, and best practices.

Production vs Development

Features	Development	Production
"Real data can be entered	✖	🛡️
Changes that may cause unintentional data loss or data corruption are reviewed by a REDCap Administrator.	✖	🛡️
Snapshots of data dictionary are logged before and after change	✖	🛡️
Changes require draft mode to safeguard data	✖	🛡️

Should I collect data in Development? NO!

You should <u>not</u> collect data in Development mode. Development mode is for developing, designing, testing, and practicing.

BEST PRACTICE
Collect real-time data in Production mode only!

How do I move data from Development to Production?

Carefully!
You can move real-time data from Development to Production without data loss by following a two-step process.

1) Project Setup -> Move your project to production status

Move your project to production status
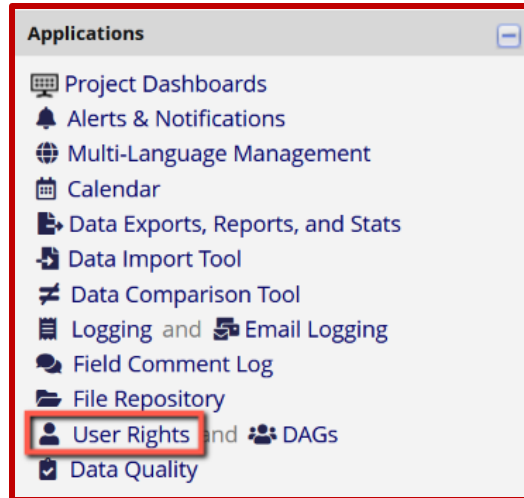

Move the project to production status so that real data may be collected. Once in production, you will not be able to edit the project fields in real time anymore. However, you can make edits in Draft Mode, which will be auto-approved or else might need to be approved by a REDCap administrator before taking effect.

Not started

Go to Move project to production

How do I move data from Development to Production?

2) Move your project to production status-> Keep existing data or delete?

Project Ownership and User Rights

Who is the project owner in REDCap?

Project teams are the owners of the REDCap projects. The REDCap Administrators do not own the REDCap projects.

Applications

- Project Dashboards
- Alerts & Notifications
- Multi-Language Management
- Calendar
- Data Exports, Reports, and Stats
- Data Import Tool
- Data Comparison Tool
- Logging and Email Logging
- Field Comment Log
- File Repository
- User Rights and DAGs
- Data Quality

BEST PRACTICE
Each REDCap project needs a minimum of two project owners.

What are the responsibilities of a REDCap project owner?

➢ Project owner has **USER RIGHTS** under Applications
➢ Project owner has full administrative rights of REDCap project.
➢ Oversees the project
➢ Ensures all project users have appropriate privileges
➢ Grant permissions and user rights (project ownership)
➢ Transfers ownership to others when they leave to maintain continuous ownership of a REDCap project.

> If you see User Rights under Applications on the left hand navigation panel in your project, **you are a project owner!**

User Rights = Project Ownership!

➢ Who is on the project?

➢ What privileges, roles, or rights do they need?

➢ User rights management is the responsibility of the project owner (the person who creates the project) and/or the user users added with User Right access.

**Know who is on the project and what rights and privileges they have**

How can I add users to my REDCap project?

To add users to a REDCap project, you need **User Rights** on the project.

> ➢ Individual with **User Rights** access can alter all privileges for all other users.
>
> ➢ This privilege should only be granted to the **highest level users.**

To grant a user access to a REDCap project

> ➢ User must have Mount Sinai credentials and a REDCap account.
>
> ➢ Log in to REDCap and then, on the My Projects tab, choose your project's name.
>
> ➢ Under "Applications", select User Rights.

How can I add users to my REDCap project?

To add users to a REDCap project, you need **User Rights** on the project.

To grant a user access to a REDCap project
- Select User Rights
- In the "Add new user" field, enter the username (**not the email address**).
- Select Add with custom rights, and then check the boxes next to the rights you want to assign to the new user.
- Select Add user.

Orphaned projects and transferring ownership

What happens if the project owner leaves and does not transfer User Rights, project ownership?

➢ REDCap Projects without active owners are considered "**orphaned**."

➢ For 'orphaned' projects in REDCap, it is crucial ensure ownership is transferred properly .

➢ A Principal Investigator or Department Administrator will need to confirm this change to this REDCap project.

➢ If this is a research project, then please ensure you are following the research protocol and adding the new project owners must to the Institutional Review Board (IRB) if necessary.

BEST PRACTICE
Transfer project ownership before
a project owner leaves the project.

How do I know if I have an orphaned REDCap project?

➢ No one on the project has access to **User Rights.**

➢ **User Rights** does not display under Applications the project.

➢ Projects without active owners are considered orphaned projects.

Expiration (click expiration date to edit)	Project Design and Setup	User Rights	Data Access Groups
never	✖	✖	✖
never	✖	✖	✖
never	✖	✖	✖
never	✖	✖	✖
never	✖	✖	✖

What are best practices for managing User Rights?

➢ **ONLY provide needed access rights**: This is especially important for the high level roles of "Project Design & Setup" and "User Rights"

➢ **Set expiration dates for users:** If you are adding a user to a project for a limited amount of time, set an expiration date for their access at the time you add them to the project.

➢ **Create and utilize User Roles in your project:** A User Role has a pre-defined level of access. For instance, you might create a user role for Data Entry to only enter data but not change project settings or delete data.

➢ **Consolidate sensitive information in one instrument**: If there are users who should not see identifiable information in the project, the best solution is to keep all of the sensitive information on one instrument and restrict access through User Rights.

➢ **Maintain at least <u>two active project owners</u> at all times.**

➢ **Departure procedures for study team members**

  ✓ Suspend access to the REDCap project in User Rights.

  ✓ Suspend individual API tokens.

Digital Concierge Services

Virtual REDCap Office Hours: Wednesdays at 3:30pm to 4:30pm
- Open to all
- Get help with specific project questions
- First-come, first-served

- Every Wednesday from 3:30 p.m. – 4:30 p.m. (ET):
  Click here to register and join

- You can also get help with other services such as: DTP Academic Technology, HPC, MSDW, Self-service Cohort Query Tools, eRAP, Data Ark Data Commons, DTP Cybersecurity, and Levy Library Resources and Services

More REDCap Office Hours
- Bonus Day scheduled once a month to accommodate users who cannot attend on Wednesdays.

Credits to Senior REDCap Administrator, Cate Bauer-Martinez for developing and creating the **REDCap Essentials** training presentation!

QUESTIONS

Mount Sinai REDCap Support.

Thank you for attending the REDCap Essentials training!
