The Clinical Research Unit

at the Icahn School of Medicine at Mount Sinai

About the Clinical Research Unit (CRU)

Established in 1963 as a General Clinical Research Center, the CRU is located on the ground floor of the Annenberg Building at 1468 Madison Avenue in New York City. The CRU is a hub for conducting clinical and translational research. The CRU currently supports 90 protocols involving a wide variety of specialties and subspecialties, with research participants of all ages. The facility is open Mon-Fri, 8AM to 5:30 PM. Walk-in (unscheduled) phlebotomy services are available (for approved studies).

What resources are available at the CRU?

- Five fully equipped exam rooms
- Outpatient nursing care
- History & physical exams by NPs
- Study medication administration
- Specimen sampling and processing
- Telemetry and standard monitoring
- Other related participant care duties

How do I apply?

Investigators interested in using CRU resources must complete an application. The CRU administrative committee reviews all applications on a rolling basis. All studies conducted on the CRU must be IRB approved. The CRU is a fee-based service (please see the application for the fee schedule). The application can be found on our website (see address below).

After approval, the PI/study team meets with CRU staff to for an in-service prior to the initiation of the study.

Where can I get more information?

For detailed submission instructions or to get more information on how the CRU can help you with your clinical research studies please visit our website at:

<http://icahn.mssm.edu/research/portal/resources/clinical-research.>

If you have not used our services before and would like to meet the staff and tour the facilities, or if you have any questions, please e-mail Joanne Zephir (joanne.zephir@mssm.edu).
